PROFESSIONAL SUMMARY

Frontend Developer with **1+ years** of experience building ERP systems, headless e-commerce platforms, crypto dashboards, and backend APIs. Strong expertise in **React.js, Next.js, Node.js, PostgreSQL, Prisma, REST APIs, and JWT authentication**, with a proven ability to deliver scalable, production-ready applications and maintain clean, high-performance architecture.

EDUCATION

B. Tech – Information Technology

Anna University, Chennai (2021 – 2025)

CGPA: 7.52 / 10

WORK EXPERIENCE

Web Developer Numerique360 — Dubai, UAE | May 2024 – Present

- Developed and maintained headless ERP dashboards for orders, products, customers, and sales analytics.
- Built custom **WordPress plugins** and **WooCommerce REST** endpoints for menus, categories, inventory, and reporting.
- Integrated WooCommerce data synchronization between WordPress and headless frontend applications
- Designed admin interfaces with search, filtering, pagination, and invoice workflows
- Developed **backend APIs** with validation, error handling, and **JWT**-based authentication.
- Contributed to crypto backend systems including swap request handling, quote processing, and status tracking.
- Integrated external provider APIs with **server-side validation**, timeouts, and structured error responses
- Implemented **database-driven tracking** for requests, responses, and failure states.
- Optimized frontend performance and improved stability with loading states and fallback handling
- Performed bug fixing, testing, and ongoing maintenance on live ERP systems, including aviation modules.

Tech Stack: React.js, Next.js, TypeScript, JavaScript, Node.js, PostgreSQL, Prisma ORM, WordPress, WooCommerce REST API, JWT, Tailwind CSS

PROJECTS

WooCommerce ERP Dashboard (Marsad)-Headless ERP platform for internal operations, providing centralized management of orders, products, customers, and sales through custom dashboards and reports.

Near Exchange – Cross-Chain Crypto Swap Platform-Backend-driven system for managing crypto swap requests and provider quotes with database-backed transaction tracking.

Crypto Exchange Web Application-Web application displaying real-time cryptocurrency prices, quotes, and swap-related data via external APIs.

Crypto Dashboard-JWT-secured dashboard showing live wallet balances and transaction activity through backend integration.

Aviation ERP System-Enterprise ERP application supporting aviation operations, focused on stability improvements and UI enhancements.

Job Application Automation Platform (Full-Stack)- Full-stack automation system built using **Playwright** for browser automation, with backend processing, database tracking, and a monitoring dashboard.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS.

Backend & APIs: Node.js, REST APIs, JWT Authentication, API Integration.

Databases & ORM: PostgreSQL, MongoDB, MySQL, Prisma ORM.

Tools & Platforms: Git, GitHub, Postman, Linux, VS Code.

CERTIFICATIONS & ACHIEVEMENTS

Elite Certificate — DBMS MongoDB Exam (2021).

Web Development Certification — Dabotics India.
